

ELEVATE CARE DELIVERY THROUGH INTEGRATED COMMUNICATIONS

Easily collaborate with colleagues and engage with patients in an integrated, secure digital ecosystem.

SEECURE is a video communication and workflow ecosystem within an integrated cloud-based platform that is HIPAA compliant and auditable.

Cloud-Based

A system of secure storage servers backed-up in multiple locations means users can access your platform from anywhere on any device.

Low Code

Create an ecosystem built for you. Supported by OutSystems, our low-code development speeds up the process to customize and integrate tools you already use to enhance your workflow.

Integrated

Easily communicates with your established web services by connecting APIs built into a custom-designed SeeCure ecosystem for your needs.

Compliant

Demonstrated compliance across all 54 HIPAA citations, 136 audited components and 19 standards. Share data and files knowing that no matter what, you are working within a secure system.

Built 100% in OutSystems on the first commercially available fully HIPAA Certified and Audited public cloud for Healthcare

Powered by

Customize your SEECURE Platform through our low-code development.

- Roles-based views for different users in your organization
- Customized branding to provide a streamlined patient experience
- Customizable workflow interface with development consultation and SEECURE PREMIUM
