The Jira suite brings organizations together with the right tools for every team

Collaborate seamlessly, no matter which Jira product you're on.

Automations: Automate repetitive tasks and processes – pull from a library of no-code rules or craft your own.

Workflows: Seamlessly keep people and teams aligned with pre-configured templates or custom workflows.

Reporting and analytics: Turn your data into real-time insights – build reports across multiple Jira projects and/or instances.

Integrations marketplace: Extend functionality and customize your Atlassian products with thousands of integrations and add-ons.

Jira Product Discovery

DISCOVERY

Jira Software

Jira Work Management

DELIVERY

Jira Service Management

SUPPORT & OPERATIONS

Jira

The Jira suite connects the dots for a continuous loop of discovery, delivery, support, and operations – from idea to impact.

DISCOVERY

Jira Product Discovery
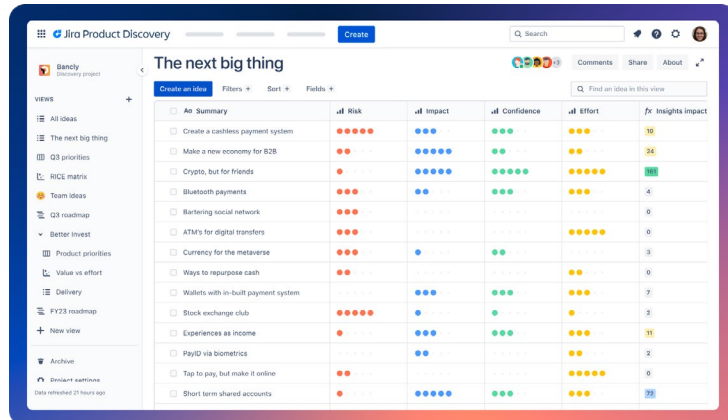

WHO IT'S FOR
Product management teams

WHAT IT DOES
Gather, prioritize, and collaborate on product ideas.

WAYS IT CAN BE USED

Collecting new feature ideas, customer pain points, and opportunity areas
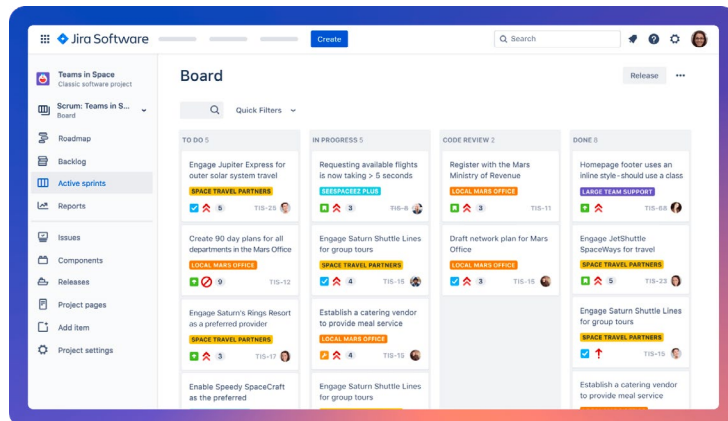

Attaching insights to support prioritization

Creating product roadmaps

Getting stakeholder feedback and buy-in

DELIVERY

Jira Software

WHO IT'S FOR
Agile teams including software developers, project managers, program managers, and scrum masters

WHAT IT DOES
Plan, track, release, and support software development.
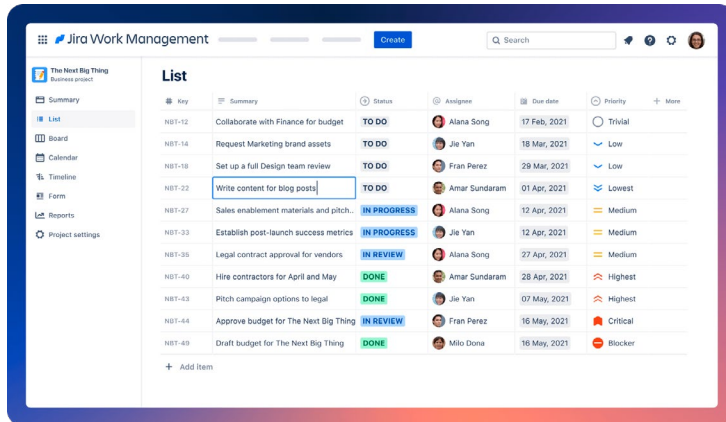

WAYS IT CAN BE USED

Managing software development

Capturing, tracking, and resolving bugs

Collaborating across product and dev teams

Reporting on agile metrics

Jira Work Management

WHO IT'S FOR

Business teams including marketing, design, sales, business operations, HR, legal, and finance

WHAT IT DOES

Plan, collaborate, execute, and report on projects.
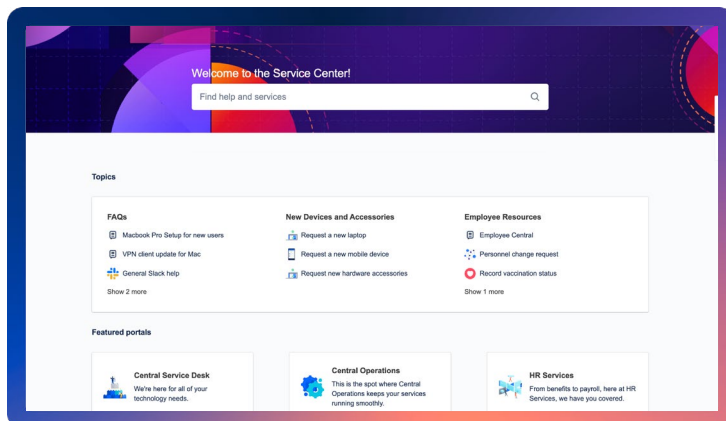

WAYS IT CAN BE USED

Coordinating a marketing launch

Tracking the sales pipeline

Managing document approvals

Gathering project-based requests from other business teams using forms

---

Jira Service Management

WHO IT'S FOR

IT support, IT operations, and business teams that need request management

WHAT IT DOES

Manage requests, respond to and resolve incidents, and minimize risk from changes.

WAYS IT CAN BE USED

Managing service requests across the organization with a portal chat, SLAs, queues, and approvals

Responding to and resolving incidents

Streamlining change requests while minimizing risk

Tracking and managing services, assets, and configuration items in a flexible database

---

Break down silos across teams.

Jira Software and Jira Work Management connect with Advanced Roadmaps for improved cross-team collaboration and visibility – available with Jira Software Premium and Enterprise.

Jira Software and Jira Service Management enable one platform for Dev and Ops teams for more customer impact with full visibility, linked issues, and a complete audit trail of changes.
